

Quantum®

VEEAM  
IT JUST WORKS!™

## RISK-FREE EVAL TRIAL

Maximize Availability at the Lowest  
TCO with Veeam and Quantum

### Maximize performance and availability at the lowest TCO for your virtual environment.

How do you efficiently protect your data in virtualized environments? You can now maximize data availability at the lowest TCO. Veeam and Quantum have partnered to help customers experience the recovery of a single email or file recovery in seconds, or the recovery time and point objectives (RTPO™) of well under 15 minutes for an entire VM at speeds that match or exceed the performance of raw disk.

Quantum optimized storage solutions for Veeam enable you to meet those objectives by leveraging a technology portfolio that includes patented high-performance deduplication and hybrid flash storage.

### Top 5 Reasons to Choose Veeam and Quantum Storage:

1. **Support for Veeam Instant Recovery®** and other industry-leading features in the Veeam Backup and Replication Suite.
2. **Speed up your backups** and reduce network loads. No landing zone. No tricks.
3. **Achieve 100% virtualization** with Quantum's DXi® V4000 series virtual appliance.
4. **Use Veeam to write full data backups directly to tape** to meet the longer retention periods.
5. **Pair the best with the best** without locking yourself into one technology.

Quantum is offering a risk-free trial on any of our best-in-class deduplication and cost-effective hybrid solutions, in conjunction with Veeam, to give you the choice of a data protection solution that fits the needs of your virtual environment.

**This risk-free eval trial is free. If you like it, keep it. If not, return it—no questions asked. Try it for yourself. The process is simple.**

Contact us now to request your free eval at [800-677-6268](tel:800-677-6268) or [info@quantum.com](mailto:info@quantum.com).
